SHARPS AND INFECTIOUS WASTE 5 SAFETY PRIORITIES

1. Practice Regular Hand Hygiene and Care

- Remember how infection spreads
- Hands transfer bacteria and viruses from surfaces through nose, mouth, eyes.
- Don't touch your face when handling infectious waste.
- Broken skin harbours germs and allows another entry point via the largest organ in our body – the skin. Take care of your skin.

2. Biohazardous Waste Containers

- Correct selection of containers to segregate waste streams
- Rigid containers for sharps
- Never put fingers into sharps containers

3. Personal Protective Equipment

- Separate yourself from bacteria and viruses
- PPE: Gloves, footwear, eyewear, face shield, dust mask, long sleave clothing, pickup sticks, shovels, spill kits

4. Handling Procedures

- Always treat sharps as potentially infectious
- Follow safe work method procedures for pickup, deposit into correct container, safe disposal for incineration
- Never touch the needle, put container down close to sharp, place sharp pointing down into container, close the lid

5. Managing Needlestick Injury

- Stay calm infection is rare
- Allow wound to bleed freely
- Immediately wash with running water and soap, rinse, dry
- Cover with bandaid or dressing
- Report to your supervisor
- Seek medical advice on HIV, Hepatitis testing, vaccination and counselling.
